

I build software that has to keep working — automated systems with real observability, full-stack web and mobile apps, and internal tools that businesses actually run on. I care about the unglamorous parts: clear logs, graceful failure, and interfaces people understand without a manual.

EXPERIENCE

Freelance Web & Internal Tools Developer 2023 — Present
Independent · Belgrade, Serbia

- Deliver production web apps and internal tools for local businesses — from understanding the problem through development, deployment and ongoing support.
- Built a Django + AI internal system for a butcher/grill business: daily P&L reports, Serbian-regulation PDF declarations and scheduled cycles.
- Shipped a production catalog site (Pilatiq Reformeri) and several client websites, working directly with owners on requirements and iteration.

Independent Systems Builder — Automation & Reliability 2025 — Present
Personal projects · Remote

- Build complex automated systems that must run reliably and stay diagnosable — agents, data pipelines and observability tooling.
- tradingAgent: a daily AI trading pipeline with live FastAPI dashboards, risk guardrails, circuit breakers and human-in-the-loop approval.
- dev-dashboard + "Brain": self-built monitoring over dozens of repos, syncing into a structured knowledge base with zero runtime dependencies.

SELECTED PROJECTS

tradingAgent — AI-driven daily trading pipeline
Python + Claude agent that runs a daily S&P 500 rotation end to end — data, scoring, risk, execution — with live dashboards and human-in-the-loop approval.
Python · Claude tool-use · FastAPI · Interactive Brokers / Alpaca · Telegram · yfinance

BelgradeBuddy AI — AI companion app for international visitors
A React Native (Expo) + Supabase mobile app for international Expo 2027 visitors: an AI chatbot with smart model routing, an arrival wizard, offline support and real-time features.
React Native (Expo) · NativeWind · Supabase · Edge Functions · OpenRouter / Claude · i18n

dev-dashboard + "Brain" system — Self-built developer observability & knowledge tooling
A Next.js + TypeScript tool that scans all my local git repos and GitHub, aggregates activity and stats, and syncs structured data into an Obsidian knowledge base.
Next.js 16 · TypeScript · Tailwind 4 · Git · GitHub API · Obsidian

Mesara Šisko — Internal business system + digital QR menu (client)
Production work for a Serbian butcher/grill business: a Django + AI internal operations system, plus a Next.js QR menu & ordering app — real requirements, real users.
Django · SQLite · Claude agents · APScheduler · Next.js 16 · React 19 · Supabase · Docker

SKILLS

- LANGUAGES
Python, TypeScript, JavaScript, Java, SQL, HTML / CSS
- FRAMEWORKS
Next.js, React, React Native (Expo), Vite, FastAPI, Node.js
- DATABASES
PostgreSQL / Supabase, SQLite, MySQL, Oracle
- AI & AUTOMATION
Claude / OpenRouter tool-use, Grok, Agent pipelines, APScheduler, Data pipelines
- TOOLS & WORKFLOW
CLI / Terminal (PowerShell, bash), Git & GitHub, Docker, Obsidian, Figma
- NETWORKING & CS
TCP/IP, Wireshark, Socket programming, GNS3, Cisco Packet Tracer, Optimization / OR
- PRACTICES
REST APIs, i18n, Testing (Vitest), Observability & logging, Agile, Technical writing

EDUCATION

B.Sc. — Information Systems & Technologies (TEP module)
Faculty of Organizational Sciences (FON), University of Belgrade
2023 — Present (3rd year, expected 2027)

LANGUAGES

Serbian — Native
English — Professional working proficiency
